

# How 3M DI-NOC Architectural Finishes Can Transform Your Home

U.S. Film Crew Article (Page 1 of 3)

## While your home may be beautiful, there may be times you'll want to change up your interiors to breathe new life into it.

Depending on the size of your home, interior upgrades can be time-consuming and very expensive. In most cases, these changes are permanent, and making more changes won't just be costly—they could also potentially affect your home's structural integrity.

3M DI-NOC Architectural Finishes are a great alternative to traditional interior upgrades. These are vinyl films that only need to be applied to your interior walls and other surfaces to give your home a new look.

What's more? These architectural finishes won't require any kind of pre-construction and they can be removed easily if you want to change up your home's interiors again.

Here's a more in-depth look at how 3M DI-NOC Architectural Finishes can transform your home.

### They add amazing textures

One of the best features of 3M DI-NOC Architectural Finishes is that they offer a wide range of beautiful and vibrant tactical finishes that give you textures of wood, metal, and stone. This makes them perfect for anyone who wants to mimic the look of these textures, without needing to acquire the actual material.

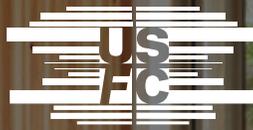

The architectural finishes are made using matte coat technology with high-definition embossing technology which makes them resistant to fingerprints and diffusing reflections. This feature is especially useful when you have children in your home, as it makes the film easier to clean when children use crayons or markers on them.

Not only do these finishes let you create a new interior space quickly, they're easier to maintain so that you can keep your home's new interiors longer.

## They create enviable spaces

The hyper-realistic looking textures these architectural finishes offer can give your home a different personality, feel, and mood that both you and your guests can enjoy. They can be applied to not just walls, but also room dividers and ceilings, allowing you to transform your interiors in many ways.

Painting home interiors has been the go-to method of giving homes a new look. Painting, however, usually involves just using a single color, and this may look a bit mundane. 3M's Architectural Finishes, in comparison, will not only add more color to your interiors but also add style.

Apart from walls and ceilings, these finishes can also be applied to kitchen countertops to give your home a more dynamic appearance.

## They offer various options

3M's Architectural Finishes offer hundreds of designs that reflect the beauty of the natural environment. From stone to metal and various textiles, the options are almost endless, giving you the freedom to choose a style that best suits your home's personality.

You can also try different textures for each of your rooms to give them their unique personalities. For example, a wood-inspired texture for bedrooms and home offices and stone for kitchens or living rooms.

With 3M's Architectural Finishes, you can let your imagination run wild and turn your home's interior into a masterpiece.

## They transform your home into an eco-conscious space

If you're environmentally conscious, you can be assured that 3M's Architectural Finishes are designed to be eco-friendly.

The finishes are made of vinyl, which means that there was no wood used in its production. So you don't need to worry about the impact it has on forests. They also allow you to mimic natural materials for your interiors, without you harvesting the actual materials from nature.
